Message

It is heartening to know that the School of Management Sciences, Technical Campus, Lucknow is organizing 2nd International Seminar on "Sources of Planet Energy, Environmental and Disaster Science: Challenges & Strategies" (SPEEDS-2015) on November 21 – 22 , 2015 in association with The Institution of Engineers (India), Lucknow and Council of Science & Technology, Lucknow..

Our civilization has undertaken reasonable amount of technological advancement but the opening up of economy and globalization of activities has led to the situation where the impacts of the challenges to civilization in any part of the world are felt world over. Recent earthquakes, untimely rains, storms, extreme weather conditions etc. are all impacts of the climate change. In view of the seriousness of these issues the theme of the seminar is quite relevant and gives opportunity to the practicing engineers, academicians and researchers to share their initiatives and activities in different areas of Energy, Environmental and Disaster Science. I understand that the deliberations will be useful for all participants from academia and industry.

I extend my best wishes for success of seminar alongwith heartiest felicitations to the organizers and the members of the School of Management Sciences for their enthusiasm and spirit for holding this event.

(Onkar Singh)
