Message

I am happy to know that School of Management Sciences, Lucknow is organising two days International Seminar on “ Sources of Planet Energy, Environment and Disaster Sciences: Challenges and Strategies (SPEEDS-2015) on 21st & 22nd November 2015.

The theme of the seminar is very pertinent and aims to improve the human life and sustainability to the socio-economic environment through modern engineering tools and approaches. The scientific deliberations in these important areas will be of immense value for formulating future applicable strategies and research studies. The issue of earth planet energy and environment has greater role for the survival of the world. The emergence of modern engineering and technologies has opened endless opportunities to deal with global issues and to create wealth. There is a strong need to put focus on natural, renewable and non- conventional energy sources to overcome the environmental damage and risks of climate change by providing sustainable management strategies.

I congratulate the members of the organizing committee and wish all the participants to gain fruitful knowledge during the scientific and technical session ensuring the relevance and success of the seminar.

(Dr.M.K.J.Siddiqui)
