ABOUT THE INSTITUTION OF ENGINEERS (INDIA)

The Institution of Engineers (India) or IEI is the largest multidisciplinary professional body that encompasses 15 engineering disciplines and gives engineers a global platform from which to share professional interest. IEI has membership strength of nearly 0.7 million. Established in 1920, with its headquarters at 8 Gokhale Road Kolkata 700020, IEI has served the engineering fraternity for over nine decades. In this period of time it has been inextricably linked with the history of modern-day engineering. In 1935, IEI was incorporated by Royal Charter and remains the only professional body in India to be accorded this honour. Today, its quest for professional excellence has given it a place of pride in almost every prestigious and relevant organization across the globe. IEI functions among professional engineers, academicians and research workers. It provides a vast array of technical, professional and supporting services to the Government Industries, Academia and the Engineering fraternity, operating from over 100 centres located across the country. The Institution has established R&D centres at various locations in the country and also provides grant-in-aid to its members to conduct research and development on engineering subjects. IEI offers a non-formal engineering course, the successful completion of which is officially recognized as equivalent to a degree in engineering. Every year as many as 60000 candidates appear for these examinations.

ABOUT SMS GROUP OF INSTITUTIONS (INDIA)

Sensing the ever growing need for competent and highly trained professionals endowed with rich business acumen, skills and aptitude to operate in the highly complex and fast changing economic and industrial environment, the SMS Society established School of Management Sciences (SMS), at Varanasi in the year 1995. SMS Varanasi has been rated as an **A+ Business School by Business India Survey**.

In the year 2008 SMS Society expanded its base to the capital of U.P., Lucknow. SMS Lucknow, has been accorded with '**A+ rating in the latest "India's Best B - School Survey 2012"** conducted by Business India and was awarded the 'National Education Leadership Award' 2013 for being the "Outstanding Engineering College of North " by ET Now. The Institute had earned various renowned awards of excellence in quality and Innovation at National and International forum.

The institution has been ranked A+ (the only institute in Lucknow) amongst the best 500 engineering colleges in India according to a comprehensive analysis by the Educationpost in the issue of 2014-15 based on : Mock IIT-JEE (Specific), Industry wise Analysis, Engineering Excellence, Corporate Interface, Employer's Views, Industry Speaks, Institute's USP, National Group Ranking and Soft-Tech Watch, conducted on Engineering Institutes in India.

IIT, Bombay has declared School of Management Sciences, Technical Campus, Lucknow, as a 'Remote Center' for empowerment of faculty & staff members through trainings.

His Excellency Prime Minister of Bhutan Shri Jigme Y. Thinly presented prestigious award to Shri Sharad Singh, CEO, School of Management Sciences, Lucknow in World HRD Congress Summit 2010-2011

SMS Lucknow offers AICTE approved PGDM, B.Tech (CS, EC, EN, ME, CE) & MBA programmes affiliated to UPTU, Lucknow. BBA, BCA, B.Com., B.Com. (Hon.) affiliated to Lucknow University and Polytechnic courses in Mechanical (Production) and Civil Engineering affiliated to Board of Technical Education, Uttar Pradesh.

SEMINAR : AN OVERVIEW

Earth is the only planet which has life. It is full of resources which can be used by human for generations. Over exploitation of these resources means dwindling of the ecological balance leading to natural calamities like- pestilences, earthquakes, landslides, heavy downpour, scanty rainfall, severe draughts etc., around the world causing about 50,000 deaths per year on an average. These also produce grave injuries leaving life to standstill and make many homeless.

The environmental issues are also harmful aspects of human activity on the biophysical environment. Environmentalism, a social and environmental movement that started in 1960s, addresses environmental issues through advocacy, education and activism. Current problems faced by the environment are the carbon dioxide equivalent of greenhouse gases (GHG) in the atmosphere, that has already exceeded 390 parts per million (NOAA) (with total "long-term" GHG exceeding 455 parts per million) as per Intergovernmental Panel on Climate Change Report. This level is considered as tipping point. "The amount of greenhouse gases in the atmosphere is already above the threshold that can potentially cause dangerous climate change. We are already at risk...It's not next year or next decade, it's now.

On the other hand climate change risks are becoming the biggest challenges of the 21st century; such as rising sea levels, that could force us to alter many ways through which economic and social activities are arranged. Climate related changes may threaten human health, disrupt economic activity, damage natural ecosystems irreversibly, and even (in worst case scenarios) may lead to mass migration, food shortage, and other global humanitarian crises. We have to outline the global climate strategy to curb it such as: conversion to lower carbon economies in both developed and developing countries, with market-based incentive schemes dominant in the former group, and low-carbon technology transfer schemes dominant in the latter.

Forthcoming seminar aims at recognizing links and addressing gaps, offering strategic recommendations for exploitation of natural, renewable and non-conventional energy sources to overcome the environmental damages and climate change risks by providing disaster management strategies and streamline the aftermath of the natural disasters and explore the probable pre and post natural disaster prevention machinery to minimize the global loss of GDP to a great extent.

Theme - Sources of Planet Energy, Environmental and Disaster Science: Challenges and Strategies

Sub Theme:

- Exploitation of natural resources
- Natural energy potential in India
- Renewable energy resources
