MESSAGE

I am extremely delighted to note that School of Management Sciences, Lucknow is organizing 3rd International Seminar on “**Sources of Planet Energy, Environmental & Disaster Science (SPEEDS-2016): Challenges and Strategies on Climate Change**” on 19th – 20th November 2016 in association with **Council of Science & Technology**, Lucknow and The Institution of Engineers (India), UP State Centre, Lucknow.

It is a matter of immense pleasure to know that **School of Management Sciences, Lucknow** has been felicitated as an outstanding Engineering Institute (North) by ET Now and recently rated an **A++** among **B-School** according to the **Business India Survey 2015**. I am also glad that “CV Raman Centre for Research & Innovation” as SMS Lucknow has been focusing on researches and showing global concern on areas of Sustainable Energy, Carbon Foot Prints, Global Warming and Climate Change.

We know that technological developments are taking fast and exploring newer fields of research and development. The theme of the Seminar *Challenges and Strategies on Climate Change* is very apt to the present scenario.

I am sure that the deliberations of the seminar will be professionally fruitful to all stakeholders and will be effective in carrying forward our efforts to put our country on global parity. I appreciate the efforts of the organizing committee for conducting such International Seminar.

I wish grand success for this seminar on Sources on Planet Energy, Environmental & Disaster Science (SPEEDS-2016): Challenges and Strategies on Climate Change.

October 13, 2016

(S.B. Nimse)
