*"99 Years of Relentless Journey Towards
Engineering Advancement for Nation Building"*

MESSAGE

It gives me immense pleasure to know that the Institution of Engineers (India) and School of Management Sciences-Technical Campus, Lucknow are jointly organizing a two day Seminar on 'Sources of Planet Energy, Environmental & Disaster Sciences' (SPEEDS-2018) on November 24-25, 2018. This is 6th Seminar in the series and this year the Seminar will be mainly focusing on, 'Climate Disturbances & it's Global Impact'. Climate change has hit rain cycle. Now we may get more quantity of rain water but spread into lesser number of days resulting in flash floods. Few parts of the world may face an increased threat of heat waves & rise in vector borne diseases like malaria and dengue. Farm income may decrease by 20% on average. So we have to limit average increase in world temperature to 2% in present century. Hope the experts attending the Seminar will deliberate on these issues and find the ways to address them.

I congratulate Prof.(Dr.) Bharat Raj Singh, Convener & his entire team for their untiring efforts to make this Seminar successful. I also compliment Mr. Sharad Singh, Secretary & CEO, SMS for giving fillip to technical activities.

I extend my best wishes for the grand success of this important & very relevant Seminar which is going to provide a plate-form for all stake holders to share their views & come out with a viable solution to save our mother earth

(V. B. Singh) FIE
